TITLE : DISPOSABLE PANTS TYPE DIAPER

ABSTRACT : PROBLEM TO BE SOLVED: To enable to draw up a diaper easily for wearing to improve usability, by forming a liquid impermeable outer face sheet of a first outer face sheet and a second outer face sheet and equipping plural finger tip engaging parts separately in parallel in the circumferential direction by the first and second outer face sheets on front and back waist range.

SOLUTION: An outer face sheet 3 of this disposable pants type diaper is constituted of a first outer face sheet 3a and a second outer face sheet overlapped thereon. In the circumferential direction of front and back waist ranges 6, 7, a finger tip engaging part 14 is formed of a folding-in part 15 which the first outer face sheet 13a is folded into and opens toward a crotch range 8 and plural window parts 16 opening outward from the position of the second outer face sheet 3b neboring to the folding-in part 15. When an infant, aged, diseased, etc., who are lack of skill on finger tips or extremely weak in pinching power are to wear a diaper by him-/her-self, since the diaper can be drawn up by engaging finger tips with the girth range of the diaper, he/she can easily wear the diaper.
